Advance your 3D Biology Research

Break through new dimensions in 3D cell culture imaging and analysis with Molecular Devices high performance customised imaging and analysis platforms.

High-performance customisations.

- Water immersion objectives
- 5- and 8- channel high intensity lasers
- Deep tissue penetrating and confocal disk module
- Turnkey high- throughput and long-term kinetics
- Real-time dose response pipettor

New!

Introducing Hamilton Storage Labware

New line of tubes provide hassle-free operation and stability in your automated workflows, increasing efficiency and saving your laboratory time and money.

- Optimised for Hamilton automated workflows
- Compatible with standard-density and high-density RackWare
- Integrates with third-party sample storage systems, liquid handling systems, and decapping devices

All tubes are capped and are available either in sterile or non-sterile options, in bulk or pre-racked, and with a 2D bottom barcode on tubes.

New!

AcroPrep™ 24-Well Filter Plates

For protein purification and 0.2µm sterile filtration workflows.

New innovation in a 24-well format for workflow improvements.

Introducing the new AcroPrep 24-well filter plates for protein purification and 0.2µm sterile filtration workflows. These new and innovative 24-well, 7ml volume, filter plates use unique combinations of Pall's proprietary high-performance filter medias to clarify and 0.2µm sterile filter in a single device and workflow step, providing time savings, high filter efficiency and streamlined workflow improvements.
